GARANTÍA LIMITADA SAKURA

SAKURA FILTERS® garantiza que sus productos estarán libres de defectos de material y mano de obra durante la vida útil del producto recomendada por el OEM (Fabricante de equipo original).

Si se descubre que los productos de **SAKURA FILTERS®** están defectuosos por defecto de fabricación, serán reemplazados.

SAKURA FILTERS®, restaurará el motor a la condición equivalente a la que existía justo antes de la falla.

En caso de falla causada por mal uso del usuario o de terceros (instalación incorrecta, alteración, modificación, accidente, manipulación incorrecta, almacenamiento inapropiado, negligencia y/o aplicación incorrecta) esta garantía se considerará nula y sin efecto.

Todas y cada una de las fallas del motor que ocurran únicamente debido a los productos de **SAKURA FILTERS®**, deben ser inspeccionadas y certificadas por el departamento de soporte técnico de **SAKURA FILTERS®**, en conjunto con el taller mecánico de la elección del cliente.

Para realizar un diagnóstico correcto, la unidad debe estar en las condiciones al momento de haber ocurrido el percance (no haber desarmado el motor o partes involucradas, cambiado y/o removidos fluidos o los productos de **SAKURA FILTERS®** en cuestión). De lo contrario se anulará dicha garantía de producto, así como la reposición o gastos de reparación durante el uso del producto.

SAKURA FILTERS® se reserva el derecho de emplear el tiempo necesario para realizar pruebas de laboratorio, análisis, diagnóstico y dictamen de reclamación para determinar la causa de la falla de nuestros productos, así como la recolección del producto en sospecha y piezas o fluidos de la unidad donde fueron instalados los productos.

SAKURA FILTERS® no es responsable de ninguna otra pérdida o gasto (traslados, tiempos perdidos, gastos de envío, asesorías técnicas o legales, quebranto de acuerdos que afecten alguna relación comercial, etc.), y responsabilidad civil consecuente por dicho defecto o reclamo de terceros.

SAKURA FILTERS® se reserva el derecho de cambiar los diseños y características técnicas de sus productos, así como su rango de aplicación sin previo aviso.

SAKURA FILTERS® no se hace responsable de ningún error o cambio provocado por el fabricante del equipo original y no ofrece ninguna garantía, ya sea expresa o implícita, en cuanto a su precisión.

PARTES DEL FILTRO DE ACEITE

RESORTE Y TAPA DE RESORTE

Diseñado para absorber vibraciones y sobre presión del sistema de lubricación, además de mantener la posición correcta del cartucho de filtración.

MEDIA FILTRANTE

Fabricada a base de celulosa vegetal, resinas fenólicas de alta calidad y fibras sintéticas, con tapas metálicas para resistir la presión de trabajo del sistema de lubricación.

VÁLVULA ANTI RETORNO

Evita el drenado del aceite del filtro cuando está apagado, previniendo el desgaste del motor en el arranque.

UNIÓN TAPA - VASO

Engargolado doble para evitar desprendimientos y fugas de aceite en el filtro.

VASO O BOTE

Fabricado con lámina de acero al alto carbón, soportando más de cuatro veces la presión normal de trabajo, con tratamiento químico, para evitar la oxidación y corrosión, del medio ambiente.

ADHESIVO SELLADOR

Adhesivo epóxico entre la tapa metálica y media filtrante, para garantizar la unión perfecta y evitar el paso de aceite sin filtrar hacia el motor.

VÁLVULA BYPASS

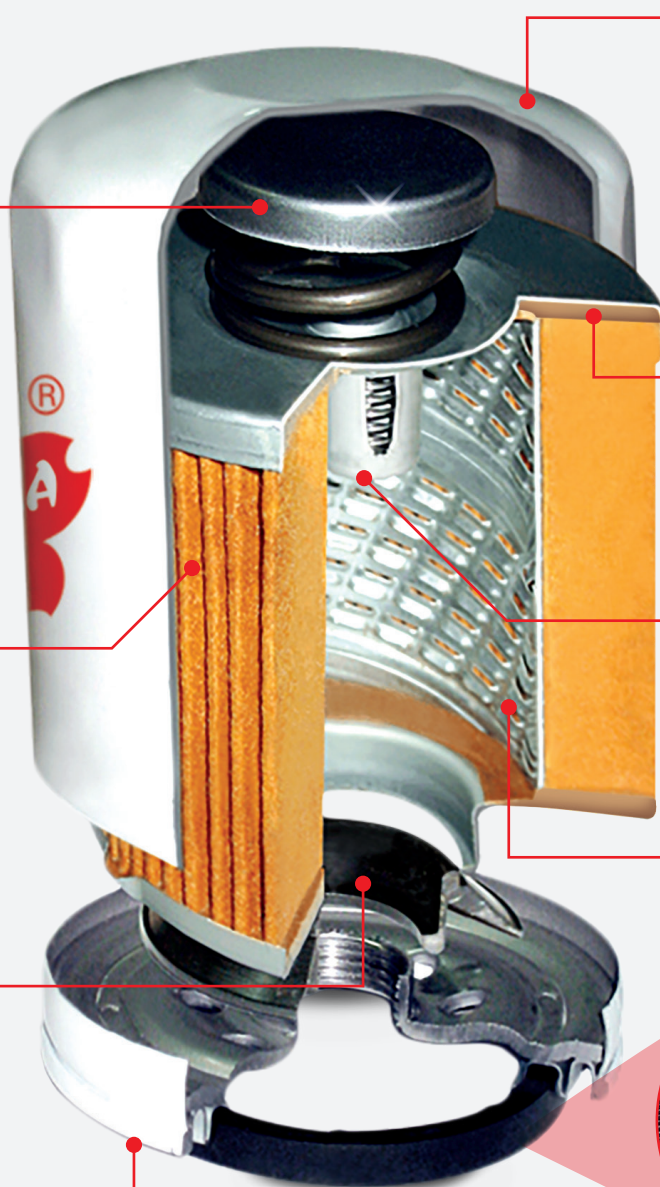

Garantiza el paso de aceite al motor, cuando la media filtrante se sature debido a la contaminación excesiva.

TUBO CENTRAL

Fabricado con lámina galvanizada y reforzada para evitar el colapso del cartucho por sobre presión, proporcionando una mejora estructural.

JUNTA O EMPAQUE

Diseño **patentado**, con perfil multifuncional reforzado, para evitar fugas de aceite, por apriete excesivo en su instalación.

FILTRO DE AIRE

JUNTA DE SELLADO

Diseño hueco en su núcleo, que garantiza un sellado perfecto, adaptándose a la superficie de contacto.

MEDIA FILTRANTE

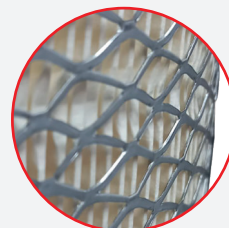

Variedad en medias filtrantes, compuestas de fibras sintéticas y resinas, con un diseño de pliegue especial, que optimiza el flujo de aire cumpliendo con los requerimientos del fabricante.

MALLA METÁLICA

Metal expandido con tratamiento químico anti oxidante, con un diseño de crimpado en espiral que brinda una mayor rigidez e integridad estructural al filtro.

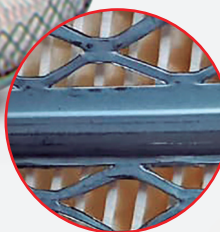

DEFLECTOR O ALETA

Con un diseño que mejora el paso de aire por todo el cuerpo del filtro para mejorar la retención de partículas sólidas de gran tamaño.

MALLA METÁLICA EXTERNA.

Diseñada para proteger de impactos y contaminantes como hojas o piedras a la media filtrante, por su diseño liso evita desgaste y desgarro en las puntas de los pliegues.

Costura de cierre en espiral.

El filtro de aire, es el dispositivo encargado de retener y filtrar todas las impurezas, como polvo, residuos orgánicos, etc. Para evitar que estos entren en el motor.

PARA EFECTUAR UN RECLAMO

Se requiere comprobante de compra del producto con fecha.

Tenga a la mano los siguientes datos.

- ❶ Datos del solicitante.
- ❷ Nombre, dirección, teléfono y correo electrónico.
- ❸ Datos del vehículo. Marca, modelo, año, VIN, motor, kilometraje.
- ❹ Información del producto.
- ❺ Numero de parte, kilómetros recorridos al momento de la falla, lugar donde se instaló el producto.

Los productos en sospecha así como partes afectadas y fluidos serán recolectados para realizar pruebas y análisis de laboratorio, a fin de dar un informe técnico mas certero.

Descripción de la falla (recomendamos ser lo más explícito posible).

Llame al teléfono de contacto: **55 6807 9410**

Correo: soporte.tecnico@tpi-mexico.com
